To determine the total siding coverage required for your project, use the following formula:

$$\left(\frac{\text{Exposure (Inches)}}{14} \right) \times 100 = \text{Square footage}$$

Note: Round your answer to the nearest Tenth

Example:

$$\left(\frac{5"}{14} \right) \times 100 = \sim 36 \text{ SF}$$

For Signature 18" R&R Shingles, the recommended exposure range is:

- Maximum exposure (single course): 8"
- Maximum exposure (double course): 14"

Always install within these limits to ensure proper weather resistance and maintain Shakertown's quality standards.

Note: All Fancy Cuts™ shingles on panels and individuals are 4 15/16" wide
